PROFESSIONAL SUMMARY

Highly motivated New Graduate in Computer Engineering with a minor in Business, proven in consultative sales and driving client success. Expertise in using data-driven analysis and KPIs to achieve growth goals. Track record of utilizing objection handling and storytelling to convert prospects into long-term clients.

EDUCATION

KETTERING UNIVERSITY

FLINT, MI / USA

Bachelor of Science in Computer Engineering, Minor in Business | 3.35 GPA June 2026

Relevant Circilium: Calculus 1-4, Physics1-2, Computer Hardware Design, Electronics, Strategic Management, Financial Accounting, Marketing, Management Concepts, Financial Accounting,

Honors and Awards: Board of Academic Trustees at Kettering University, Greek man of the year, Esports Varsity Captain.

PROFESSIONAL EXPERIENCE

Active Environmental

Tampa Bay, Florida

Sales Representative

July, 2025 – August, 2025

- Achieved quarterly business growth and productivity targets by securing over \$20K+ in new customer contracts by going door to door using data-driven and solution-oriented sales tactics.
- Maintained a 95% account retention rate on customer accounts, demonstrating a relentless focus on customer success and exceptional client relations.
- Utilized storytelling and effective objection-handling to build compelling narratives and translate prospects' business needs into long-term client solutions.

Detroit Diesel

Detroit, Michigan

Computer Engineering Intern

January 2023 - March 2025

Over 2.5 years at Detroit Diesel, I gained experience through a rotational co-op program that included roles in Data Analytics, Project Management, and Software Development.

Thesis Project: Automated Python Toolchain for Software Release Validation

- Collaborated cross-functionally with the Hardware in the Loop team to develop \ an automated pipeline for semi-truck collaboration software, which automated the validation process.
- Drove a process efficiency initiative that reduced the time spent by engineers validating software releases by 50%.
- Used Python to intertwine GitHub, securing legacy testing software, with the ability to integrate new testing tools.

Co-op Rotations

- Project Management: Applied KPIs and strategic goals to budget R&D projects, structuring and presenting financial information with clear recommendations to upper management for resource allocation and approval.
- Data Analytics: Developed a Python signal interpolation algorithm as a data-driven analysis to optimize file storage and preserve key data.

LEADERSHIP EXPERIENCE

Pi Kappa Alpha Fraternity, Kettering University

External Vice President April 2024 - April 2025

- Managed and aligned 31 members across five committees (recruitment, social, athletic, PR), demonstrating exceptional relationship management and ability to drive team focus.
- Communicated recruitment strategies with the chapter that led to 13 men joining in one recruitment cycle.
- Integrated SMART goals and KPIs into chairmen positions to establish trackable metrics and achieve qualitative improvements in chapter operations.

Kettering Student Government, Kettering University

Class Representative November 2021 – December 2025

- Acted as a key stakeholder liaison, effectively communicating concerns and wants from the student body to the student senate and the faculty administration.
- Hosted large-scale events for the student body that successfully achieved over 100 students in attendance.
