PROFESSIONAL SUMMARY

Business-minded Computer Engineer with hands-on experience in outbound sales, SaaS go-to-market, and customer-facing roles. Generated \$20,000+ in new customer contracts through high-volume prospecting and consultative selling. Combines technical depth with a customer-obsessed mindset and a track record of driving results in fast-paced, startup environments. Passionate about helping organizations adopt technology that creates measurable business value.

EDUCATION

Kettering University

Bachelor of Science in Computer Engineering, Minor in Business. Board of Academic Trustees, Greek Man of the Year, Esports Varsity Captain. GPA: 3.43.

Flint, MI

June 2026

EXPERIENCE

Head of Social

Socialync

February 2026 – Present

Detroit, MI

- Collaborated directly with founders on go-to-market initiatives for an AI-powered SaaS startup.
- Analyzed engagement metrics and customer feedback to refine outreach strategy and improve marketing effectiveness.
- Produced podcasts, short-form videos, and marketing content supporting product growth and customer acquisition.

Sales Representative

Aptive Environmental

July 2025 – August 2025

Tampa Bay, FL

- Generated more than \$20,000 in new customer contracts through high-volume outbound prospecting and consultative door-to-door sales.
- Applied storytelling and objection-handling techniques to qualify prospects, build trust, and deliver solutions aligned with customer needs.

Lean Engineering Co-op

Marmon Holdings, Perfection Hytest

February 2026 – March 2026

Charleston, SC

- Led cross-functional process improvement initiatives with engineering and operations teams, improving workflows across 100,000+ returned products.
- Developed standardized operating procedures to improve consistency, traceability, and long-term scalability.
- Created documentation and workflow processes that improved collaboration across engineering and operations teams.

Computer Engineering Intern

Detroit Diesel

January 2023 – March 2025

Detroit, MI

- Thesis Project: Automated Python Toolchain for Software Release Validation
- Collaborated with Hardware-in-the-Loop engineering teams to develop an automated Python validation pipeline for semi-truck software release testing and verification.
- Reduced software validation time by 50% through automation of release testing workflows and engineering processes.
- Integrated GitHub version control into legacy validation infrastructure, improving collaboration, traceability, and development efficiency.
- Applied project management principles to budget R&D projects using KPIs and strategic goals, presenting financial insights to senior management.
- Developed a Python-based signal interpolation algorithm to optimize file storage and preserve key data.

ACTIVITIES & LEADERSHIP

Pi Kappa Alpha Fraternity, Kettering University

External Vice President and Recruitment Chair

April 2024 - April 2025

- Managed and aligned 31 members across five committees (recruitment, social, athletic, PR), driving team focus and measurable chapter improvement. Integrated SMART goals and KPIs into chairman positions, establishing trackable metrics that contributed to a 13-man incoming recruitment class.
